Adaptations in Class Activity

- In your groups review the following student profile summaries.
- Then review Chart of Potential Adaptations, select 2-3 adaptation and short reasoning for choosing that strategy (based on student's profile)

STUDENT A: Terry is in Grade 5 and receiving special education services 30 minutes a day for reading. The remainder of his day is in the regular classroom. He is receiving instruction at his grade level in all of the core curriculum areas except reading. Decoding is difficult for him but comprehension is not a big problem.

STUDENT B: Josh is in Grade 8. He has a Category H designation: "Severe Behaviour Disorder". His academics are well below grade level in all areas. He is being instructed at the 5th grade level in reading, and at the 6th grade level in math. His reading difficulties make it difficult for him to learn the science and social studies core curriculum but with assistance in reading the content and oral assignments and testing he is being successful. He has difficulty staying on task and becomes aggressive when frustrated.

STUDENT C: Anne is in Grade 5 and has a Category C designation: "Moderate to Profound Intellectual Disability". She is working on recognizing basic survival words and beginning money concepts such as recognizing coins and counting them. She participates in music, art, and home economics in the regular classroom. She is also being taught skills contained in the second grade core language arts and math. She works well with frequent encouragement from the teacher.
